## Germany's Education Minister visits NUST

Hon Bettina Stark-Watzinger, the Minister of the German Federal Ministry of Education and Research (BMBF), visited the University's High-Tech Transfer Plaza Select (HTTTPS). Her objective was to specifically engage with the doctoral candidates enrolled in the SASSCAL Graduate Studies Programme in Integrated Water Resources Management (SGSP-IWRM).

The Hon Minister spent a significant amount of time speaking to the students during the posters exhibition that formed part of the event attended by several high profile delegates.

The SGSP-IWRM equips students with the knowledge and skills necessary to excel in the water sector. It was specifically developed in response to a need for adequate human resources in water management and sciences, particularly in SASSCAL member countries.
